

3. HOW THE TRANSPORT PROCESS WORKS

3.1 BOOKING PROCESS FLOW

Step 1: Shipper Creates Booking

CRITICAL REQUIREMENT: Payment Before Broadcasting

No booking will be broadcasted to transporters until payment is confirmed. This ensures:

- No time wasted by transporters on unpaid bookings
- Platform revenue security
- Reduced fake/spam bookings
- Better marketplace trust

Payment Verification Process

For Digital Payments (EcoCash/OneMoney/Bank):

1. Shipper creates booking
2. System generates payment reference: PT-2025-001234
3. Payment instructions displayed
4. Shipper pays via chosen method
5. System awaits payment confirmation
 - Mobile money: Instant (real-time API)
 - Bank transfer: 2-24 hours
6. **ONLY** after payment confirmed → Booking broadcasted to transporters
7. Funds held in escrow until delivery complete

For Cash Shippers (Must Use EcoCash Agent):

1. Shipper creates booking
2. System generates unique payment code: PT-2025-001234
3. Instructions displayed: *"Pay via EcoCash Agent: 1. Go to ANY EcoCash agent 2. Select 'Pay Merchant/Biller' 3. Enter Palmtrent Biller Code: 123456 4. Enter Payment Reference: PT-2025-001234 5. Amount: USD \$XXX.XX 🕒 Payment valid for 2 hours"*
4. Shipper visits EcoCash agent (any location)

5. Agent processes payment to Palmtrent merchant account
6. Payment confirmation instant (EcoCash API → Palmtrent)
7. **ONLY** after confirmation → Booking broadcasted
8. Booking automatically cancelled if not paid within 2 hours

Alternative for Cash Shippers Without EcoCash Access:

OneMoney Agent Payment:

- Same process as EcoCash
- Use OneMoney biller code
- Instant confirmation

InnBucks Agent Payment:

- Similar process
- May have slight delay (5-10 minutes confirmation)

Bank Deposit (Last Resort):

- Shipper deposits to Palmtrent bank account
- Must include booking reference in narration
- Confirmation takes 2-24 hours
- Booking held in "pending payment" status
- Broadcasted once payment confirmed
